ABOUT ME

I'm Felipe Mora, a computer science engineer interested in problem-solving and application development. I enjoy learning new technologies and find this constant evolution to be what motivates and excites me the most.

WORK EXPERIENCE

Junior Software Engineer (Promotion)

Flagare Company ‖ March 2024 - April 2025

Development of applications and websites primarily using the Liferay platform, complemented by technologies such as React, Node.js, MySQL, and others.

Software Engineer Trainee

Flagare Company ‖ December 2023 - February 2024
During this period I carried out my professional internship, focusing mainly on the development of front-end components using native Liferay tools.

PROJECTS

CCHC Public and Private Web Update

In this project I made front-end and back-end requirements (to a lesser extent) for both sites

LATAM private web update

Project focused on updating one of LATAM's private portals, in which I was assigned greater responsibilities, focusing mainly on front-end development and site management.

COMPROMISO-PRO publishes web update

Project in which I performed front-end-oriented functions, specifically to fix issues raised by clients/QA.

KNOWLEDGE
